Education

Dr. D. Y. Patil Institute of Management & Research

2026

Master of Computer Applications (CGPA: 7.94/10)

Pimpri, Pune, Maharashtra

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies

Pratibha College of Commerce & Computer Studies

2023

Bachelor of Science in Computer Science (CGPA: 8.08/10)

Pune, Maharashtra

- Relevant Coursework: Programming in Java, Python, PHP, Data Structures, DBMS, Web Development, Computer Networks

Experience

CCPI Software Private Limited

Jan 2026 – Apr 2026

Software Developer Intern

Pune, Maharashtra

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, PHP, and MySQL.
- Collaborated with the development team to design, develop, test, and debug full-stack web applications.
- Integrated frontend interfaces with backend components and optimized application performance.
- Participated in code reviews, feature implementation, bug fixing, and Agile development practices.
- Worked with Git for version control and contributed to team-based software development workflows.

Projects

Job Finder Portal with Resume Builder | HTML, CSS, JavaScript, PHP, MySQL

- Developed a full-stack job portal application enabling users to search for jobs and create professional resumes.
- Implemented user authentication, job listings, resume builder, and CRUD operations for jobs, users, and resumes.
- Designed a responsive frontend using HTML, CSS, and JavaScript with a PHP backend integrated with MySQL.

Face Recognition Attendance System | React.js, Node.js, Express.js, OpenCV, Supabase

- Built a real-time attendance management system using facial recognition technology.
- Integrated OpenCV and the face recognition library for face detection and recognition.
- Developed REST APIs using Node.js and Express.js and integrated Supabase for authentication, PostgreSQL, and cloud image storage.
- Automated attendance logging and record management, reducing manual attendance effort.

Disease Prediction and Medical Cure | Python, Flask, HTML, CSS, JavaScript, Machine Learning

- Developed an AI-based disease prediction system using Decision Tree, Random Forest, and Logistic Regression models.
- Performed data preprocessing and analysis using Pandas and NumPy for symptom-based disease prediction.
- Built an interactive Flask web application with REST APIs to provide disease predictions along with precautions, medications, diet, and workout recommendations.

Technical Skills

Programming Languages: Python, Java, PHP, JavaScript, SQL

Technologies: HTML5, CSS3, React, Node.js, Express.js, Flask, MySQL, PostgreSQL (Supabase), OpenCV, Pandas, NumPy, Scikit-learn

Tools: Git, GitHub, Postman, Supabase, Power BI, Excel, Google Sheets, N8N

Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), REST APIs, Database Management Systems (DBMS), Full-Stack Web Development, Machine Learning, Agile Methodology

Certifications

Exploratory and Predictive Analysis using Python – EY

EY Data Visualization using Tableau – EY

EY Business Intelligence using Power BI – EY
